

HOMETIME GARAGE DOORS

Exceptional Function, Elevated Style

THE FINISHING DETAIL YOUR HOME DESERVES

Time for an Upgrade

OLD AND OUTDATED

Is your garage door enhancing your home's curb appeal, or is it making your home look dated? It's time to upgrade to a sleek, modern garage door that complements your home's style.

FALLING APART

Your garage door may have seen better days. Cracks, dents, or rust spots are signs that your door is wearing down and needs a durable replacement.

NOISY AND UNRELIABLE

If your garage door creaks, groans, or struggles to open, outdated mechanisms are likely to blame. A new system will provide quiet, smooth, and reliable operation every time.

LACKING INSULATION

An uninsulated garage door can lead to uncomfortable temperature swings, making your garage too hot in the summer and too cold in the winter, costing you more in energy bills.

We understand you want a garage door that not only works seamlessly, but also adds beauty and value to your home.

Your Solution

SMOOTH, QUIET OPERATION

Advanced technology ensures smooth, quiet operation, so your garage door performs effortlessly every time.

BUILT TO LAST

Built with high-quality materials, our garage doors are designed to withstand daily wear and tear, providing years of reliable use.

CUSTOMIZABLE DESIGN

Choose from a wide range of styles, finishes, and hardware options to perfectly match your home's aesthetic.

ENERGY EFFICIENT

With superior insulation, our doors help regulate your home's temperature, improving energy efficiency and lowering utility costs.

SMART INTEGRATION

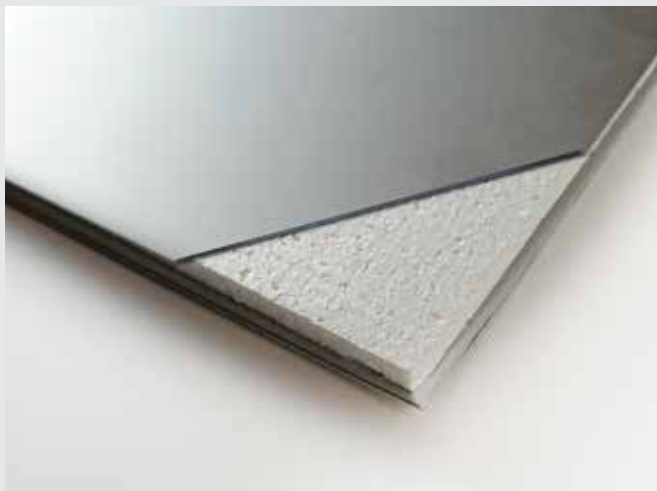

Our garage doors are compatible with the latest smart home systems, allowing you to control and monitor your door from anywhere.

Building Your Garage Door

STEP 1

Select Your Style

Begin your garage door journey by exploring our 10 distinct styles. Whether you prefer a modern, sleek look or something more traditional, you'll find the perfect match for your home. Each style is designed to complement different architectural elements, allowing you to enhance both curb appeal and functionality.

STEP 2

Choose Your Model

Next, choose the model that suits your practical needs. Our models vary in insulation options and are built with different materials to ensure the perfect balance of durability and energy efficiency. Whether you're looking for basic or superior insulation, we have a model for every need.

STEP 3

Customize Your Door

Now, it's time to get creative! Customize your garage door with a variety of window insert designs, select from a range of glass options, and choose the exterior finish that will best complement your home's style. This is where your door becomes uniquely yours, combining both beauty and functionality.

STEP 4

Pick Your Operator

Complete the process by selecting one of our professional grade garage door operators, each designed to meet different levels of convenience and performance. From quiet operation to smart features, we've got the right fit for your needs. Don't forget to browse our range of accessories to enhance your door's functionality even further.

RAISED PANEL

Short Panel, Sandstone

RAISE THE STANDARD

Add depth to your garage door with our raised panel design, available in both short and long panel options. The raised panels start with a recessed edge, but the interior surface of each panel is brought slightly forward, adding just a hint of definition to a classic garage door design.

STRONG. QUIET. VERSATILE.

Choose from the best in smart home and security features to simplify your life, stay connected to home and protect what matters most. From ultra-quiet to super strong, it's easy to find a LiftMaster garage door opener that not only fits the needs of your garage, but also elevates your everyday life.

OPERATOR ACCESSORIES

LiftMaster remote controls and accessories add the finishing touches to your garage upgrade or help you replace older equipment with new, top-of-the-line ones.

STANDARD REMOTE

1 Standard Remote is included with every garage door project. Additional remotes can be added.

KEYPAD

Looking for an exterior wireless entry option? Add a keypad to your garage door project!

SMART KEYPAD

For added security and ease of operation you can add a wireless video keypad to your project.

With myQ connectivity, our garage door openers, gate operators and commercial door operators can be controlled right from your smartphone or through our cloud-based software. You'll know when a door or gate has been left open and can close it with a tap, no matter where you are.

TORSION SPRINGS

Torsion springs help to lift each garage door with ease and included with every project. Choose one of our springs below based on your anticipated use. A cycle includes one up and down movement.
